Important Update - Hospital Based Rural Health Clinics Providers

North Carolina Hospital Based Rural Health Clinics complete their Medicaid cost report based on the hospital's completed 2552 cost report. CMS issued a Memorandum dated September 02, 2011 with the subject of "Cost Report Filing Extensions" reflecting revised due dates for cost reports using the newly issued 2552-10 software. CMS requires the use of the 2552-10 software for all hospital providers with full 12 months or greater cost reporting periods, which begin on or after May 1, 2010 (and end on or after April 30, 2011). North Carolina Medicaid cost reports for Hospital Based Rural Health Clinic Providers will follow the same schedule for due dates as outlined below.
