

Goals & Outcomes

- Focus on the needs of the individual being served rather than the specific service currently being received.

- Identify transitional and long term supports and services in concert with the consumer and their family (when appropriate)

- Don't forget the value of natural supports!

- Assess any potential gaps in service array and draft service definitions to address

- Identify strategies to:

- maintain the integrity of the provider community as individuals transition to other services

- maintain quality and continuity of care through effective, efficient individual and system planning

- Develop communication strategies for disseminating information to individuals/families, providers, LME's and other system partners

- Develop formal and informal tracking systems that allow for accountability at all levels of the system.
