

Community Support Steering Committee (from 080609 meeting)

Deby Dihoff submitted the following additions to the Goals and Objectives:

- Add a bullet/strategy that provides for ongoing training for providers in peer support (and other definitions for that matter) that maintains fidelity to the model, offers geographic accessibility for predictable turnover at the provider level, and updates the service/training to incorporate new evidence from research. The specific tactic I would push on this would be Centers of Excellence- other states have these training centers that really do help the providers maintain excellence in service delivery through an infrastructure of continual training and monitoring.
- The tracking system strategy should incorporate linking outcomes to services provided for particular diagnostic groups of kids so we can see the impact on school retention, family preservation, staying out of trouble with the law, etc. etc.
