**Dynavox PalmTop3
Augmentative with GE Speaker
Phone**

**Vendor Awarded: Dynavox
Systems**

The Palmtop3 is an excellent AAC solution for customers looking for a small, lightweight portable device with powerful communication abilities.

The Palmtop3 combines Impact communication software and sleek styling that appeals to augmented communicators of all ages with existing or emerging literacy skills.

Message composition and delivery on the Palmtop3 is quick and easy with rate enhancement features like word and character prediction, abbreviation expansion, auto-capitalization, auto-spacing and auto-learn new words. Built-in hardware buttons can also be programmed to meet an individual's unique needs like shortcuts for common functions. New Acapela voices provide more choice and higher quality voice output, and the devices include the popular DECTalk speech synthesizer and capacity for over 200 minutes of digitized speech recordings.

W30
