SECTION II – DESCRIPTION OF FINDINGS	
Clear description of findings (findings for each criterion checked in Section I must be described):	
Impression/Diagnosis:	

***STATUTORY DEFINITIONS for Form No. DMH 5-72-19-2**

Dangerous to others. - Within the relevant past, the individual has inflicted or attempted to inflict or threatened to inflict serious bodily harm on another, or has acted in such a way as to create a substantial risk of serious bodily harm to another, or has engaged in extreme destruction of property; and that there is a reasonable probability that this conduct will be repeated. Previous episodes of dangerousness to others, when applicable, may be considered when determining reasonable probability of future dangerous conduct. Clear, cogent, and convincing evidence that an individual has committed a homicide in the relevant past is prima facie evidence of dangerousness to others.

Dangerous to self. - Within the relevant past the individual has done any of the following: (1) acted in such a way as to show all of the following: (I) The individual would be unable without care, supervision, and the continued assistance of others not otherwise available, to exercise self-control, judgment, and discretion in the conduct of the individual's daily responsibilities and social relations or to satisfy the individual's need for nourishment, personal or medical care, shelter, or self-protection and safety. (II) There is a reasonable probability of the individual suffering serious physical debilitation within the near future unless adequate treatment is given. A showing of behavior that is grossly irrational, of actions that the individual is unable to control, of behavior that is grossly inappropriate to the situation, or of other evidence of severely impaired insight and judgment shall create a **prima facie** inference that the individual is unable to care for himself or herself. (2) The individual has attempted suicide or threatened suicide and that there is a reasonable probability of suicide unless adequate treatment is given. (3) The individual has mutilated himself or herself or attempted to mutilate himself or herself and that there is a reasonable probability of serious self-mutilation unless adequate treatment is given. NOTE: Previous episodes of dangerousness to self, when applicable, may be considered when determining reasonable probability of physical debilitation, suicide, or self-mutilation.

Local management entity/managed care organization or LME/MCO. - A local management entity that is under contract with the Department to operate the combined Medicaid Waiver program authorized under Section 1915(b) and Section 1915(c) of the Social Security Act.

Local management entity or LME. - An area authority.

Mental illness. - When applied to an adult, an illness which so lessens the capacity of the individual to use self-control, judgment, and discretion in the conduct of the individual's affairs and social relations as to make it necessary or advisable for the individual to be under treatment, care, supervision, guidance or control. When applied to a minor, a mental condition, other than an intellectual disability alone, that so lessens or impairs the minor's capacity to exercise age adequate self-control and judgment in the conduct of the minor's activities and social relationships so that the minor is in need of treatment.

Qualified professional. - Any individual with appropriate training or experience as specified by the General Statutes or by rule of the Commission in the fields of mental health or developmental disabilities or substance abuse treatment or habilitation, including physicians, psychologists, psychological associates, educators, social workers, registered nurses, certified fee-based practicing pastoral counselors, and certified counselors 122C-3(31).

Substance abuser. - An individual who engages in the pathological use or abuse of alcohol or other drugs in a way or to a degree that produces an impairment in personal, social, or occupational functioning. Substance abuse may include a pattern of tolerance and withdrawal.
