## INTRODUCTION

In recent years there have been two separate reports(Annual Statistical Report for LMEs and the Admissions Report for LMEs) that have provided descriptive statistics and trends in the public community mental health system in North Carolina. In an effort to provide a single source of information that adequately describes the type of clients served at the clinical, demographic and geographic level these two reports have been combined into a single report for State Fiscal Year 2018. While similar in format and table construction to the previous reports, the intent of this report is to provide an integrated look at major service indicators and measures.

**Figure 1**  
**Selected Indicators and Percent Change Over Time**  
**State Totals, Fiscal Year 2018, 2013, 2008**

<b>Indicators</b>	<b>Fiscal Year</b>			<b>Percent Change FY18 vs. FY13</b>
	<b>FY18</b>	<b>FY13</b>	<b>FY08</b>	
Active Caseload Start of Fiscal Year	259,382	189,693	218,875	36.74%
Total Admissions	113,299	143,521	88,032	-21.06%
Total Terminations	94,608	71,334	57,020	32.63%
Active Caseload End of Fiscal Year	278,073	261,880	249,887	6.18%
Persons Served	372,681	333,214	306,907	11.84%

## **TABLE I**

**Client Activity and Utilization (Table I)** reflects admission rates, active caseload at the beginning of the fiscal year, total admissions and the total number of persons served by the LME-MCO. There were **246,947** active cases on July 1, 2017 and **89,454** total admissions (first and readmissions combined) during the fiscal year. A total of **336,401** persons were served during fiscal year 2018 as indicated by adding first and readmissions to the active cases (excluding those on Inactive Status and TASC Clients) on July 1, 2017. Graph 1 depicts the number of clients served at the LME-MCO for the last ten years.

Admission rates reflect the total number of admissions to an LME-MCO during the fiscal year per 100,000 population in the catchment area. Admission rates are useful in that they allow comparisons among geographic areas as well as special population subgroups by adjusting the effects of population size. Admission rates were selected instead of utilization rates because of their greater accuracy.

The statewide admission rate was **860** admissions per 100,000 population. The admission rate ranged from a low of **465** per 100,000 reported by Alliance Behavioral to a high of **1,415** per 100,000 population reported by Trillium.

**TABLE I  
CLIENT ACTIVITY AND UTILIZATION BY NAME  
NORTH CAROLINA LMES  
FY2017-2018**

	ADMISSION RATE*	ACL 7/1/2017	TOTAL ADMISSIONS	TERMINATIONS	PERSONS SERVED
Alliance Behavioral	465	57,082	8,909	1,453	65,991

<b>STATE TOTAL</b>	860	246,947	89,454	71,267	336,401

\* Rate per 100,000 N. C. Populatn ( 2018 Population Estimate.)  
Admission Rate = Total Admissions / Population x 100,000.

Please Note: There is a difference in Total Admissions, Terminations and Persons Served from the previous pages (Figure 1), when compared to the State Total in Table 1. The reason for this difference is that TASC clients are included in Figure 1, but not Table 1. TASC clients were not included in Table 1 as they are not associated with an LME.

This graph reflects the number of persons served by the 7 LME-MCOs for the time period FY2009 through FY2018. This data reflected in this graph does not include persons on inactive status.

A total of **336,401** clients were served by LMEs during **FY2018** representing a **3.01 %** increase over the **326,563** during **FY 2009**.

## **TABLE 2**

Table II reflects the number of persons served in each of the LME-MCOs by age and disability. The age of the client was calculated as of 6-30-18 and the disability of the client was based on the diagnosis assigned to the client on the NCTRACKS paid claim.

A total of **372,681** persons were served in the LME-MCOs and TASC during FY18. Persons Served is calculated by totaling the active caseload on July 1, of the fiscal year (excluding those clients on Inactive Status) and all admissions.

Of the **372,681** clients served, **69** percent (**257,213**) were mentally ill, **4.81** percent (**17,941**) were developmentally disabled, and **26.17** percent (**97,257**) were substance abusers. Within each disability the percent of children served (0-17) ranged from **0.55** percent (**538**) of substance abusers, to **22.22** percent (**3,986**) of the developmentally disabled. The percent of children served in the mental health category was **14.8** percent (**38,063**).

### **TABLE 3**

The data reflected in this table included admissions by diagnosis and marital status. The aggregate groupings of diagnosis are based on the ICD9 and ICD10 (International Classification of **Diseases, 9<sup>th</sup> Revision Clinical Modification**, International Classification of **Diseases, 10<sup>th</sup> Revision Clinical Modification**)

Of the diagnosis reported at the time of admission, substance abuse (**38,618**) accounted for (**34.1%**) of all admissions. However, when looking at Psychiatric Diagnosis only, which represented (**55.5%**) of all diagnosis, major depressive disorders (**18,968**) accounted for (**16.7%**) of all admissions. There were (**9,881**) alcohol abuse admissions which accounted for (**8.7%**) of all admissions.

In the marital category, the largest group is those who are single, representing **70.9%** of all admissions.

TASC ADMISSIONS ARE INCLUDED IN TABLE 3.

**TABLE 3A**

The data in this table reflects admission characteristics by race, sex and age categories.

Males represented the majority of the total admissions **59.4%** with females representing **40.6%** of the total admissions.

When looking at race categories during FY18 non-white admissions numbered **42,414** or **37.4%** of the total reported. Of the non-white admissions reported **1.6%** was American Indians.

The age group composition of LME-MCO's admissions reflects that **30.6%** fell within the 25 to 34 age group. When admissions are grouped by the three major age groups, **10.2%** were 0-17, **88.3%** was between 18-64 years of age and **1.5%** were 65 years and older.

**TABLE 3B**

Table 3B reflects the duplicated number of admissions for each of the LME-MCO's by age and disability. The age of the client was calculated on the admission date and the disability of the client was based on the diagnosis assigned to the client on the NCTRACKS Paid Claims.

Of the **113,299** clients admitted, **55.5% (62,886)** were mentally ill, **0.91% (1,031)** were developmentally disabled, and **43.59% (49,382)** were substance abusers. Within each disability the percent of children served (0-17) ranged from **1.10% (545)** of substance abusers, to **52.47% (541)** of the developmentally disabled. The percent of children served in the mental health category was **16.59% (10,434)**.

**TABLE 4**

This table includes selected indicators for all terminations while the preceding four tables focused on admissions. This table was included since diagnostic classification may change during the course of treatment and final diagnosis should be more accurate.

The relationships described for admission diagnosis remained true for termination diagnoses, although absolute numbers and percentages changed. Substance abuse accounted for **36.8%** of terminations versus **34.1%** of admissions. Adjustment disorders accounted for **3.9%** of terminations versus **4.3%** of admissions while major depression disorders accounted for **14.6%** versus **16.7 %** at admission.

**Table 5**

Table 5 reflects the unduplicated count of persons served in each of the LME-MCO's by age and disability. The age of the client was calculated as of 6-30-18 and the disability of the client was based on the diagnosis assigned to the client on the NCTRACKS Paid Claims.

A total of **363,393** persons were served in the LME-MCO's during FY18. Persons Served is calculated by totaling the active caseload on July 1, of the fiscal year (excluding those clients on Inactive Status) and all admissions.

**Table 6**

The screening process was discontinued on 7/1/2016 and data no longer available for this table.

**Table 7**

The data in these tables reflects the drug of choice for all 49,382 LME/TASC admissions with a substance abuse principal diagnosis.

Alcohol was the drug of choice for **(12,391)** admissions which represented **25.09%** of all substance abuse admissions.

Marijuana/Hashish was the drug of choice **(11,549)** admissions which represented **23.39%** of all substance abuse admissions.

Other Opiates was the drug of choice for **(6,128)** admissions which **12.41%** of all substance abuse admissions.
