

Dementia

Fronto-Temporal Dementias

Alzheimer's Disease:

- Young onset
 - Chromosome 21-associated dementias
- Late life onset

Lewy Body Disease:

- Parkinsons related
- Diffuse Lewy Body

Vascular Dementias:

- Multi-infarct
- Single-infarct
- Subcortical
- CADASIL

Other Dementias:

- Posterior Cortical Atrophy (PCA)
- Normal pressure hydrocephalus (NPH) – associated dementia
- Chronic traumatic encephalopathy (CTE) – associated dementia
- Genetic syndromes
 - Huntington's Disease (HD)
- Infectious diseases (e.g., Creutzfeldt-Jakob disease; CJD)
- Metabolic diseases
 - Neuronal Ceroid Lipofuscinosis (NCL; Batters disease)
- Toxicity: induced by long-term exposure
 - Wernicke-Korsakoff Syndrome (WKS; Alcohol-induced dementia)
 - Methamphetamine induced
