PUBLICATION DATE: December, 2012

INTRODUCTION

In recent years there have been two separate reports(Annual Statistical Report for LMEs and the Admissions Report for LMEs) that have provided descriptive statistics and trends in the public community mental health system in North Carolina. In an effort to provide a single source of information that adequately describes the type of clients served at the clinical, demographic and geographic level these two reports have been combined into a single report for State Fiscal Year 2012. While similar in format and table construction to the previous reports, the intent of this report is to provide an integrated look at major service indicators and measures.

FIGURE 1

**SELECTED INDICATORS AND PERCENT CHANGE OVER TIME
STATE TOTALS, FISCAL YEAR 2012, 2007, 2002**

INDICATORS	FISCAL YEAR			PERCENT CHANGE FY12 vs. FY07
	FY12	FY07	FY02	
Active Caseload Start of Fiscal Year	174,610	236,749	229,265	-26.2%
Total Admissions	140,674	78,589	87,857	79.0%
Total Terminations	113,603	74,790	86,607	51.9%
Active Caseload End of Fiscal Year	201,681	240,548	230,515	-16.2%
Persons Served	315,284	315,338	317,122	0.0%

Note: Persons Served data for FY12 excludes clients on inactive status

TABLE I

Client Activity and Utilization (Table I) reflects admission rates, active caseload at the beginning of the fiscal year, total admissions and the total number of persons served by LME. There were **166,373** active cases on July 1, 2011 and **126,635** total admissions (first and readmissions combined) during the fiscal year. A total of **293,008** persons were served during fiscal year 2012 as indicated by adding first and readmissions to the active cases (excluding those on Inactive Status and TASC Clients) on July 1, 2011. Graph 1 depicts the number of clients served at the LMEs for the last ten years. Please notice that this report reflects the name of the LME before merging July 1, 2012. The new MCO/LME name will be reflected in the FY2012-2013 annual report.

Admission rates reflect the total number of admissions to an LME during the fiscal year per 100,000 population in the catchment area. Admission rates are useful in that they allow comparisons among geographic areas as well as special population subgroups by adjusting the effects of population size. Admission rates were selected instead of utilization rates because of their greater accuracy.

The statewide admission rate was **1,310** admissions per 100,000 population. The admission rate ranged from a low of **150** per 100,000 reported by Onslow-Carteret to a high of **2,494** per 100,000 population reported by PBH .

STATE TOTAL	1,310	166,373	126,635	100,671	293,008

* Rate per 100,000 N. C. Populaton (2012 Population Estimate.)
Admission Rate = Total Admissions / Population x 100,000.

Please Note: There is a difference in Total Admissions, Terminations and Persons Served from the previous pages (Figure 1), when compared to the State Total in Table 1. The reason for this difference is that TASC clients are included in Figure 1, but not Table 1. TASC clients were not included in Table 1 as they are not associated with an LME.

PERSONS SERVED BY N.C. LMEs

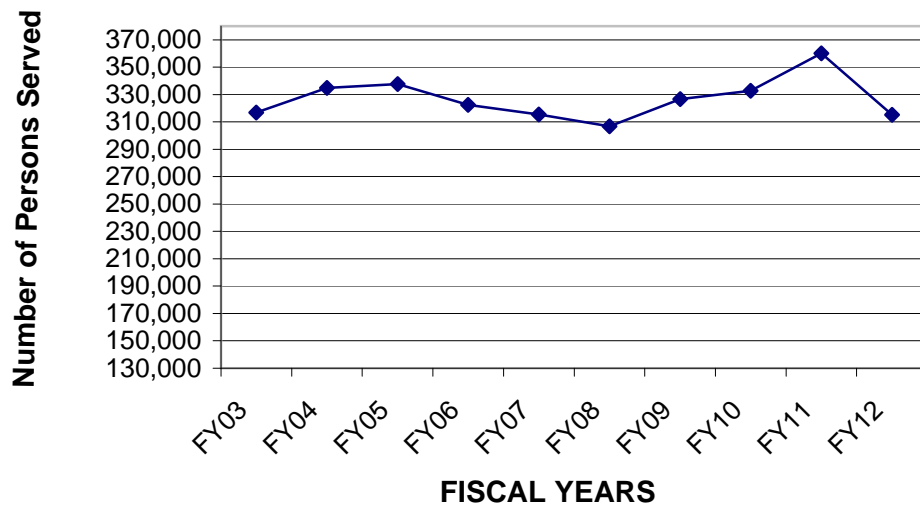

TABLE 2

Table II reflects the number of persons served in each of the LME's by age and disability. The age of the client was calculated as of 6-30-12 and the disability of the client was based on the diagnosis assigned to the client on the IPRS/Medicaid paid claim.

A total of **315,284** persons were served in the LMEs during FY12. Persons Served, is calculated by totaling the active caseload on July 1, of the fiscal year (excluding those clients on Inactive Status) and all admissions.

Of the **315,284** clients served, **69** percent (**218,360**) were mentally ill, **6** percent (**20,170**) were developmentally disabled, and **24** percent (**76,754**) were substance abusers. Within each disability the percent of children served (0-17) ranged from 2 percent (**1,479**) of substance abusers, to **29** percent (**5,832**) of the developmentally disabled. The percent of children served in the mental health category was **18** percent (**55,451**).

TABLE 3

The data reflected in this table included admissions by diagnosis and marital status. The aggregate groupings of diagnosis are based on the ICD9, International Classification of Diseases, 9th Revision Clinical Modification.

Of the diagnosis reported at the time of admission, substance abuse (**28,741**) accounted for (**20%**). However, when looking at Psychiatric Diagnosis only, which represented (**65.1%**) of all diagnosis, major depressive disorders (**16.4%**) accounted for the most frequent diagnosis. Clients diagnosed with mental retardation accounted for **2,521 (1.8%)** of all admissions while alcohol abuse accounted for **8.9%**.

In the marital category the largest group are those who are single, representing **62.5%** of all admissions.

TABLE 3A

The data in this table reflects admission characteristics by race, sex and age categories.

Males represented a majority of the total admissions **53.5%** with females representing **46.5%** of the total admissions.

When looking at race categories during FY12 non-white admissions numbered **54,354** or **38.6%** of the total reported. Of the non-white admissions reported **1.6%** were American Indian.

The age group composition of LME's admissions reflects that **22.3%** fell within the 25 to 34 age group. When admissions are grouped by the three major age groups, **21.4%** were 0-17, **76.6%** were between 18-64 and **2.0%** were 65 years and older.

TABLE 3B

Table 3B reflects the duplicated number of admissions for each of the LME's by age and disability. The age of the client was calculated as of 6-30-12 and the disability of the client was based on the diagnosis assigned to the client on the IPRS/Medicaid paid claim.

Of the **140,674** clients admitted, **67** percent (**94,683**) were mentally ill, **3** percent (**3,997**) were developmentally disabled, and **30** percent (**41,994**) were substance abusers. Within each disability the percent of children served (0-17) ranged from **3** percent (**1,297**) of substance abusers, to **36** percent (**1,444**) of the developmentally disabled. The percent of children served in the mental health category was **29** percent (**27,333**).

TABLE 3C

Table 3C reflects the unduplicated number of admissions for each of the LME's by age and disability. The age of the client was calculated as of 6-30-12 and the disability of the client was based on the diagnosis assigned to the client on the IPRS/Medicaid paid claim.

Of the **134,878** clients admitted, **68** percent (**91,286**) were mentally ill, **3** percent (**3,928**) were developmentally disabled, and **29** percent (**39,664**) were substance abusers. Within each disability the percent of children served (0-17) ranged from **3** percent (**1,244**) of substance abusers, to **36** percent (**1,422**) of the developmentally disabled. The percent of children served in the mental health category was **30** percent (**26,979**).

TABLE 4

This table includes selected indicators for all terminations while the proceeding four tables focused on admissions. This table was included since diagnostic classification may change during the course of treatment and final diagnosis should be more accurate.

The relationships described for admission diagnosis remained true for termination diagnoses, although absolute numbers and percentages changed. Substance abuse accounted for **21.1** percent of terminations versus **20.4%** of admissions. Adjustment disorders accounted for 3.4 percent of terminations versus **4.7** percent of admissions while major depression disorders accounted for **15.2** percent versus **16.4** percent at admission.

Table 5

Table 5 reflects the unduplicated count of persons served in each of the LME's by age and disability. The age of the client was calculated as of 6-30-12 and the disability of the client was based on the diagnosis assigned to the client on the IPRS/Medicaid paid claim.

A total of **304,767** persons were served in the LME's during FY12. Persons Served is calculated by totaling the active caseload on July 1, of the fiscal year (excluding those clients on Inactive Status) and all admissions.

Table 6

The data reflected in this table included screenings by time line and after triage.

Of the screenings reported (57,974) clients were referred for Basic benefits which accounted for 48% of all screenings and Enhanced benefits (28,699) which represented 24% of all screenings. For the timeline of the screenings reported (72,652) clients were categorized as Routine which accounted for 60% of all screenings. (25,511) were categorized as Urgent which accounted for 21% of all screenings. (20,077) were categorized as Emergent which also accounted for 17% of all screenings.

Table 7

The data in these tables reflects the drug of choice for all 41,994 LME/TASC admissions with a substance abuse principle diagnosis.

Alcohol was the drug of choice (13,250) admissions which represented 32% of all substance abuse admissions. Marijuana/Hashish (Cannabis) was the drug of choice for (11,115) admissions which represented 27% of all substance abuse admissions. Other Opioids was the drug of choice for (6,130) admissions which 15% of all substance abuse admissions.
